KENTUCKY COMMUNITY & TECHNICAL COLLEGE SYSTEM

16 COLLEGES

All Part Of One System

When participating in the NCCBP on a system-level having multiple colleges there can be many challenges, issues, and advantages.

Issues / Advantages

- Multiple ways to pull required data fields.
- Different college specific needs.
- Time spent pulling data by one office can be a challenge but at the same time it can help support college personnel.
- Compare institutions within the system using the same data fields.
- Do you enter data elements that are not available for all 16 colleges?

NATIONAL COMMUNITY COLLEGE BENCHMARKING PROJECT

INTRODUCTION

The *National Community College Benchmark Project (NCCBP)* is a benchmarking tool that is used to compare community colleges from across the United States. In 2010, 268 community colleges from across the United States participated in the NCCBP data collection process. The NCCBP is a program of the National Higher Education Benchmarking Institute, a division of Johnson County Community College located in Kansas City, KS. The NCCBP provides community colleges with aggregated national and peer reports related to institutional outcomes and effectiveness in an effort to provide an adequate instrument for colleges to compare performance with peer institutions and provide sound data for various accountability measures. The measures are comprised of two main areas, student outcomes and institutional features. In the area of student outcomes the NCCBP measures retention and success in developmental/remedial courses and core academic areas. Institutional features explore issues related to human resources, staffing, faculty load, population, and finance. In 2010, nine KCTCS colleges (Bluegrass, Bowling Green, Gateway, Hazard, Henderson, Jefferson, Maysville, Southeast Kentucky, and West Kentucky) participated in the project. Other KCTCS colleges also participate in the project but do so on a rolling basis (i.e., every other year, every five years, etc.). For the first time, KCTCS also submitted an aggregated system-level dataset. This allows KCTCS to compare the effectiveness and outcomes of the system with other large community college systems and districts.

PEER SELECTION

Of the 268 participating institutions only a handful are classified as a part of a community college system. As a result KCTCS selected a set of seven peer institutions for this national comparison. The selection process was based on the colleges that identified in their application to the NCCBP that they are a system and were providing a system-level aggregated dataset to the NCCBP. Table 1 lists demographic data on each of the selected peer institutions.

Communicate Results RESEARCH BRIEFS AND ANALYSIS

NATIONAL COMMUNITY COLLEGE BENCHMARKING PROJECT

PEER COMPARISON

While KCTCS ranks above the median value of selected peer institutions (and often at or above the NCCBP national rates) in many NCCBP benchmark measures, highlighted in this research brief are the top KCTCS successes and challenges related to student success. Of forty-eight measures, KCTCS ranked at or above the median value for 26 (or 54.2%) of all measures collected by the NCCBP.

KCTCS SUCCESSES

Three-Year Graduation Rate (degrees or certificates) – Thirteen percent of KCTCS’ fall 2006 part-time IPEDS GRS cohort graduated with a degree or certificate within three-years. As a result, KCTCS graduates part-time students at a rate that is seven percentage points higher than any of the other peer institutions. KCTCS and one other peer institution are graduating part-time students at a rate that is above the NCCBP national median of 5%.

PEER COMPARISON

While KCTCS ranks above the median value of selected peer institutions (and often at or above the NCCBP national rates) in many NCCBP benchmark measures, highlighted in this research brief are the top KCTCS successes and challenges related to student success. Of forty-eight measures, KCTCS ranked at or above the median value for 26 (or 54.2%) of all measures collected by the NCCBP.

KCTCS SUCCESSES

Three-Year Graduation (degrees or certificate) percent of KCTCS' fall time IPEDS GRS cohort with a degree or certificate three-years. As a result graduates part-time state rate that is seven percentage points higher than any peer institutions. KCTC other peer institution : graduating part-time s rate that is above the l national median of 5%

KCTCS CHALLENGES

Credit-Student Persistence: Next-Term (Fall 2008) – KCTCS' fall-to-fall persistence rate equals the median value for peer institutions of about 49%. However, the persistence rate for students returning to KCTCS in the next-term (following term) is below the median rate for both KCTCS peers and NCCBP national persistence rates. The fall 2008 next-term persistence rate for KCTCS credit-seeking students was 64% which is 8% less than the top two peer institutions.

Persistence: Next-Term

As a result, KCTCS graduates part-time students at a rate that is seven percentage points higher than any other peer institution graduating part-time students at a rate that is above the national median of 5%

KCTCS CHALLENGES

Credit-Student Persistence: Next-Term (Fall 2008) – KCTCS' fall-to-fall persistence rate equals the median value for peer institutions of about 49%. However, the persistence rate for students returning to KCTCS in the next-term (following term) is below the median rate for both KCTCS peers and NCCBP national persistence rates. The fall 2008 next-term persistence rate for KCTCS credit-seeking students was 64% which is 8% less than the top two peer institutions.

CONCLUSION & IMPLICATIONS

Overall, KCTCS students are performing academically and graduating at rates at or above our selected peer institutions and NCCBP national rates, which is encouraging. By reducing the number of students who withdraw from a course and enrolling academically ready students in college-level courses KCTCS is achieving higher graduation rates—even for the part-time student population. KCTCS students are also performing at a high rate in distance learning and online courses offered through KCTCS Online. Of those KCTCS students completing distance learning courses, three-quarters do so with a passing grade, which is in line with peer institutions and the national NCCBP pass rates. As a result, KCTCS is assisting in providing a pathway for highly skilled individuals to enter the workforce or transfer into a 4-year baccalaureate program.

55%

NCCBP comparisons suggest opportunities for KCTCS to better assist students seeking a credential. Although KCTCS fall-to-fall persistence rates are similar to peer and national rates, the next-term persistence rate is among the lowest by comparison. By increasing and improving student support services, financial aid, and academic support, students may be more prepared to re-enroll in their second subsequent term. As a result, students will have the ability to progress through their academic program at a faster pace, especially for students requiring some form of remediation prior to enrolling in college-level courses. The reduction in length of time-to-degree is a critical component of maintaining a high level of graduation and student transfer for KCTCS. Secondly, KCTCS has the opportunity through

UTILIZATION OF DATA ELEMENTS BY VARIOUS COLLEGE GROUPS

• Data reports integrated, summarized, and distributed to:

- Benchmarking Committee
- College Data Team
- College Leadership Team
- President's Staff
- Board of Directors

- Cross-reference reports by subject area (e.g., developmental education retention and success)
- Focused reports by subject area (e.g., Faculty Workload)
- Comparative analysis of subject area (e.g., eLearning vs. in-person course completion rates)
- Distribution of JCTC Issue Briefs

EXAMPLE

Data Sources for Student Perception of Departments or Services

Academic Deans/Campus Directors

Program of study has been sufficiently challenging	ACT Faces of the Future	Section IV	Item 16
Availability of Instructors outside of class time	ACT Faces of the Future	Section IV	Item 17

PROCESS

- JCTC Office of Institutional Research integrates various data sources' information into themes or topics.
- Reports disseminated to College leadership and selected committees, but are available to all College personnel.
- Administration and committees utilize information in reports for strategic planning, program review, institutional effectiveness reporting, area review and evaluation processes, and prioritization of projects.

OUTCOMES

- Addition of FYE 105: First Year Experience Course is **Mandatory**
- Realignment of Student Services
 - All First Time at Jefferson Students Attend **Mandatory** SOAR Sessions
 - Financial Aid/Financial Literacy Project
- Remedial Math Bootcamp
- Modularized Remedial Math Courses
- First-Time Freshmen Tracker Hired
